EDUCATION

NORTHEASTERN UNIVERSITY | BACHELOR OF SCIENCE IN COMPUTER SCIENCE, JUNE 2019

Relevant Courses: Programming Languages, Game AI, Web Development, Networks and Distributed Systems, Computer Systems, Database Design, Software Development, Algorithms and Data, Object-Oriented Design.

EXPERIENCE

SCHONFELD STRATEGIC ADVISORS | PROGRAMMER/DATA ANALYST

July 2018 – Dec 2018 | New York, NY

- Developed on projects involving automation, data processing, visualization, and analysis.
- Fulfilled data science duties for team primarily involving Python (pandas), SQL, Q, and Excel.
- Updated company data as well as streamlining processes for unmanageable legacy code.

CHARLES RIVER DEVELOPMENT | SOFTWARE ENGINEER

Jan 2017 – June 2017 | Burlington, MA

- Wrote programs in Java/C# on a large existing codebase, gaining experience with Perforce and Ant.
- Created and executed Java unit and automation tests within framework.
- Validated system enhancements, fixes, and user processes; expedited employee workflows with utilities.
- Maintained development and test environments by upgrading and maintaining databases and servers.

NORTHEASTERN UNIVERSITY | TEACHING ASSISTANT FOR COMPUTER SCIENCE DEPARTMENT

Jan 2017 – July 2019 | Boston, MA

- Taught fellow classmates Java, Object-Oriented Design, and teamwork.
- Nurtured their understanding of fundamental and intricate course concepts.

SKILLS

LANGUAGES

Java, Python, C#, C, Racket, SQL, Q (KDB), HTML, CSS, JavaScript, ReactJS, AngularJS, Node.js.

SOFTWARE AND TOOLS

Eclipse, IntelliJ, DrRacket, Visual Studio, Git, MobaXterm, Control-M.

PROJECTS

ADVENTURE GAME (ONGOING)

- Leading development team for interactive adventure game using Ren'Py engine. Wrote script and code, freelancing for art and other assets.

MUSIC EDITOR

- Developed music editor in Java using Model-View-Controller pattern and Object-Oriented practices.
- Created multiple views for playing songs and allowing the users to edit them in real-time.

TETRIS WITH AI CONCEPTS

- Developed a variation of a Tetris game that utilized Decision Tree Learning to assign various "personalities" to the pieces as the game went on.

AQUARIUM UI AND DATABASE

- Built UI with Ruby on Rails that could query a database and support CRUD functionality.

EXTRACURRICULAR ACTIVITIES

BITS & BOTS

- Developed open source curriculum and taught beginner robotics lessons in lower-income areas of Boston.
- Coordinated with public libraries, helped lead meetings.
